

# INFLATABLE SEAL FOR BULK BAG SEALING

Western Polyrub manufactures inflatable seal for bulk bag sealing, its mainly made from food grade ,high strength neoprene or nbr rubber.

We also provide silicone rubber on request

The filling head of bulk bag consists of an inner and outer feed tube with bag inflator and dust extraction spigot and western inflatable seal.

The bulk bag inlet spout is inserted over the feed tube outlet, and the western Polyrub seal is inflated to create a dust tight connection between the two Displaced, dust laden air is extracted through the outer tube, which vents through a dust sock or to your central dust collection system
